How to remove the faucet cover

1   Pull the transparent ring toward you.

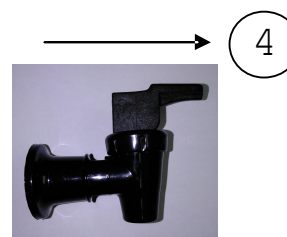

2   Then ,pull on the ring in a angle and keep the pressure downward

3   Slide the cover toward you

4   Position the lever on the actual faucets .
 ** They must be straight so that the push button when press down catches the faucet lever. **

Before placing back the cover, you could try by pressing on levers to see if water is coming out correctly.

5   Put back the cover , slide it into place.
